INSULATED GLASS WINDOW UNITS

Lifetime Transferable Warranty

1. BASIC WINDOW UNIT

The Castle Window vinyl replacement windows are warranted against any defect in material and workmanship under normal use and service for as long as the window units remain within the opening that they were originally installed in.

2. INSULATED GLASS UNITS

The insulated glass units for all Castle Windows containing Low-E glass with argon gas are warranted to be free from material obstruction of vision cause by film formation, dust, dirt or moisture collection between the interior surface of the glass due to failure of the air-tight seal, under normal use and service, for as long as the window unit remain within the original opening for which it was installed. Castle Windows will provide replacement unit(s) free of charge, including labor.

3. GLASS BREAKAGE

Castle Windows will replace accidental glass breakage free of charge including labor for the life of the warranty.

4. TRANSFERABILITY OF WARRANTY

The Warranty extends to any person who is an owner of the property in which the windows were originally installed and to each transferee owner of such property and windows.

5. LABOR AND SERVICE

If your window or any part thereof is defective in a manner covered by this Warranty, we will replace the defective part with a new part at no charge.

6. CONDENSATION

No representation is made with respect to condensation on the windows, as condensation is the natural result of moisture in the house and changes in temperature and humidity. It does not indicate a defective window.

7. EXCLUSIONS

- This Warranty is made in lieu of all other expressed warranties
- In no event shall the company be liable for special, incidental or consequential damages or any delays in the performance of this warranty due to circumstances beyond its control.
- This warranty does not cover damage caused by vandalism, abuse, alteration, tampering, improper maintenance, negligence failure of structure, fire, lightning, hurricanes, tornadoes, or other acts of God.

If the window glass fails to meet the Warranty, Castle Windows will provide the replacement glass to you free of charge, including labor. Due to varying dye lots used in the manufacturing process of the glass variances in the tint of the glass may occur. This variance is caused by minimal variations between each dye lot used in the tinting of the glass. Therefore, when replacement of the glass unit is required an exact color match to existing window units cannot be guaranteed.

Due to the unlimited time length of the warranty, should the glass unites or parts incorporated into any of its products become unavailable at the time of any claim under this warranty, Castle Windows reserves the right to substitute, at its sole discretion, any other component of equal or better quality as a replacement.

DESCRIPTION OF WORK

Service and cleaned ac unit the dual capacitor was weak calling for a 40 it was down to 30 mfd. replaced it ran and checked ac running ok at this time. Unit is 24 years old and has Freon in it recommend upgrading unit

TASK	DESCRIPTION	QTY	PRICE	TOTAL
89-0090	PREV MAINT - AIR CONDITIONER: Annual preventative maintenance on your Air Conditioner or Heat Pump. This service includes: - Replacing standard sized (16x20 - 16x25 - 20x20 - 20x25) 1"thick fiberglass air filter - Clearing the condensate drain line - Clean the Outdoor Coil - Check Refrigerant Pressures & Temperature Split - Check all Electrical Functions & Safeties	1.00	\$189.95	\$189.95
73949	DUAL CAPACITOR: DUAL CAPACITOR *- 15/5 To 50/5 MFD, 370/440V, Oval or Round - The compressor and fan motor in your outdoor unit has a booster pack to get started. This booster pack is called a capacitor. It has a power rating on the side & yours is out of specs. If we do nothing today, this will eventually lead to a failed capacitor, and in the best case scenario you will have us back for a "no cooling (or no heat with a heat pump)" call where we will have to charge you for a diagnostic fee plus this capacitor. In worst case scenario, we find out that the failed capacitor caused the compressor or fan motor to overwork and one (or both) of them need replaced as well. We can avoid this entire scenario by being proactive and taking care of it today.	1.00	\$350.00	\$350.00

DESCRIPTION OF WORK

Replaced defrost board and sensors, contactor as well.

TASK	DESCRIPTION	QTY	PRICE	TOTAL
HVS-CHP-ECA-00009	Replace Defrost Board: We offer a professional solution to replace a faulty or malfunctioning defrost board in your HVAC system, ensuring efficient and reliable defrosting operations. Our service includes: 1. Assessment: Our technicians will assess the condition of your HVAC system's defrost board and diagnose any issues affecting its functionality. 2. Defrost Board Selection: We'll select a compatible defrost board that matches the specifications and requirements of your HVAC system, ensuring proper compatibility and functionality. 3. System Shutdown: We'll safely shut down the system, isolating it from power sources to ensure a safe replacement process. 4. Electrical Disconnection: Our skilled technicians will disconnect the electrical connections from the existing defrost board, adhering to proper electrical safety protocols. 5. Defrost Board Removal: We'll carefully remove the old defrost board, taking precautions to prevent any damage to the wiring or other system components. 6. New Defrost Board Installation: Our experts will professionally install the new defrost board, ensuring proper alignment, connection, and secure wiring. 7. Electrical Connection: We'll reconnect the electrical wiring to the new defrost board, ensuring proper connections and adherence to industry standards.	1.00	\$817.70	\$817.70

8. **Testing and Calibration:** After installation, we'll test the system to ensure the new defrost board is functioning correctly, and we'll make any necessary adjustments for optimal defrosting operations.
9. **System Startup:** Once the replacement is complete, we'll restart the system, verify proper operation, and make any necessary adjustments for optimal performance.

Trust our reliable service to replace the defrost board in your HVAC system, ensuring efficient and reliable defrosting operations, and maintaining the proper functioning of your system in colder temperatures.
